# SlowStop® Bollards

PROTECT REBOUNDABLE TOUGH MODULAR VERSATILE

## Dynamic Collision Shield

### ABSORB IMPACTS

A cost effective solution that protect people & infrastructure from damage and injuries.

Rigid fixed protection bollards and concrete structures still often cause unnecessary damage to vehicles, the bollards themselves, or even to the objects that need protection. Thanks to the SlowStop® Bollard dynamic protection system, you can easily avoid this now. SlowStop® drastically reduces your costs because the risk of accidents causing vehicle, material, asset or facility damage is avoided while reducing the chance of personal injury.

### WHAT IS SLOWSTOP?

Quite simply, SlowStop is a revolutionary new bollard systems that uses a hidden elastomer to allow the bollard to tilt when impacted, then return to its normal upright position.

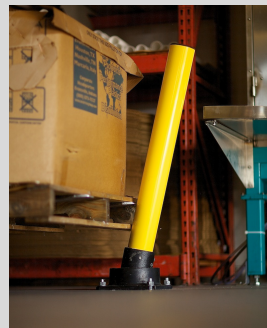

### WHAT ARE SLOWSTOP'S BENEFITS?

- Protects your assets
- Reduces installation costs
- Reduces maintenance
- Reduces liability

### WHY CHOOSE SLOWSTOP?

- Installation is quick and simple
- No more core holes in your concrete
- Eliminate broken bollards and concrete
- Forklift loads are less likely to be thrown
- Enjoy the ability to easily move bollards
- Create fencing without welding using our modular connectors.
