

Fall 2019

Inside Sales /Customer Service

Our Inside sales support professionals are our biggest asset in retaining high customer satisfaction. We will assist by responding to inquiries, helping with issues, and providing updates on requests. Our inside sales staff is continuously trained on new products of all three of our divisions: G P Roadway Solutions safety equipment and supplies, Peterson Sign Company – custom signs, & Unistrut Hawaii – channel & fittings.

Inside Sales /Customer Service Team

From L to R: Nicole Young (Supervisor), Tammy Canyon, Austin Jones (Oahu Manager), Lee Gray, & Sanoe Tibayan.

Instant Road Repair

Instant Road Repair is a rapid-curing asphaltic concrete patching material that hardens in place so there is no shoving or displacement when vehicles drive over it. Instant Road Repair is not just a pothole patch but a permanent repair. There is no mixing or heating required before application and can be applied in any weather. Cold mix asphalt contains diesel or naphtha cutbacks and are therefore slow curing. This allows for cold mix to be pushed out of place if vehicles go over it within the extremely long curing process. Instant Road Repair is non-hazardous, non-caustic and non-flammable unlike cold mix asphalt.

Filtrex SiltSoxx filter sock

is made of filter media encased in Filtrex Mesh. It is designed to support stormwater management, sediment & erosion control and pollutant removal Best Management Practices (BMPs). It is generally used in areas where diverting, cleaning and filtering stormwater runoff is critical. SiltSoxx is often used in combination with other sediment control systems to create a complete solution.

Track Out Grates

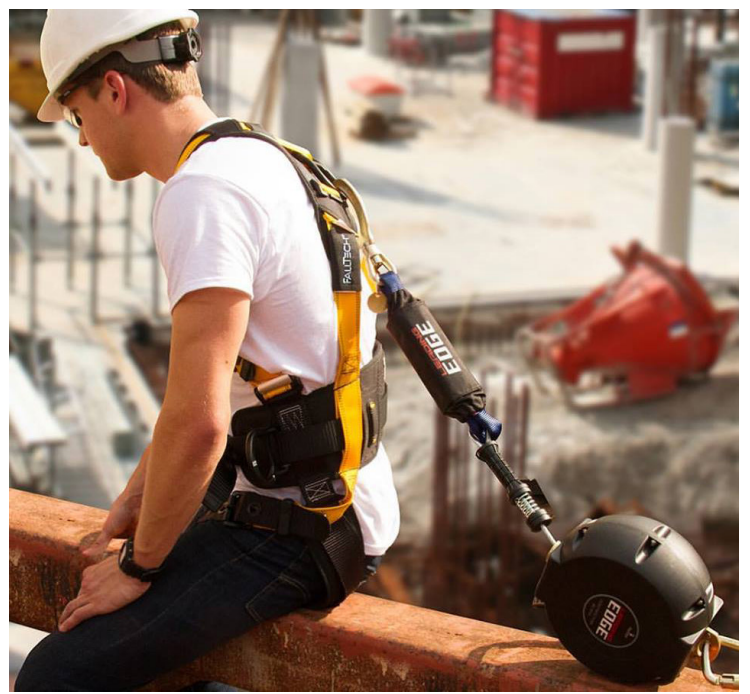

We have heavy duty steel track out grates with an open bottom, allowing debris to fall through. Innovative design allows for minimal maintenance; saving you time and money. These are referred to as shaker plates, rumble plates / rumble strips, and rattle grates. These track out grates are made from tubular steel, are 8' x 10' & only weigh 1,350 lbs! Great for stabilized entries on base rock or dirt or as ramps on concrete or asphalt. Excellent option to help comply with SWPPP. Available for sale or rental.

Andrew Macdonald

Outside Sales Representative GPRS

Specializes in environmental, fall protection & specialty/hard to find job site products. Andrew has over 30 years of sales and management experience which allows him to understand your project needs and to provide optimal solutions. Andrew has advised business owners, project managers and superintendents on the recommended needs for their projects and can help provide multiple options to ensure project success.

Leading Edge

No matter what edge you're facing, the FallTech™ DuraTech® Leading Edge delivers the highest level of fall protection. It's tough enough for daily jobsite abuse, while being light enough to carry and stack. It's been fine-tuned for an exceptionally smooth payout, so you can work without worrying about nuisance lockup.

- Meets ANSI Z359.14-2014 for leading edge applications
- Anchor overhead or at foot level
- Reduced nuisance lockups
- Cast aluminum housing design for long durable life
- Extra large, double locking anchorage carabiner included
- 7/32" galvanized steel cable
- External energy absorber with patented ViewPack® cover
- Load-indicating swivel snap hook
- Stackable housing

University of Hawaii Sand Beach Volleyball Court Banners

UH wanted to brand the fence around their beach volleyball court with their “Live Aloha, Play Warrior” tag line. We created a mesh banner that allows wind to pass through but has their name and logo at the top of the fence. This mesh banner is a unique way to cut down on player distraction and noise from off the court.

Raena Inn

Outside Sales Representative, Peterson Sign Co. Specializing in custom signs, vehicle wraps, exterior, interior, facility, and architectural signage. Raena will help you get a sign permit and make sure you are abiding by all the appropriate regulations that associations may have yet allow you to make an artistic statement about your business within your budget.

Harry & Jeanette Weinberg K-4 Village Donor Wall at Assests School

The foundation wanted to acknowledge and showcase all the donors responsible for the first phase of the building of the campus at Assets School. We incorporated the colors of the school along with natural images, to create a fitting tribute to the donors in an artistic, fun accent to the building. The wall has become an inviting location for visitors to take selfies there.

UNISTRUT HAWAII

a division of **GP Roadway Solutions**

www.UnistrutHawaii.com

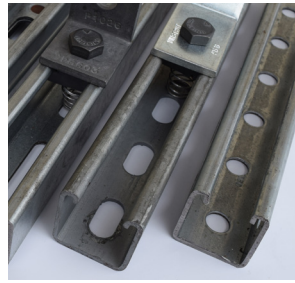

Liana Bisch

Outside Sales Representative, Unistrut Hawaii
Liana has worked with several facets of construction in different capacities from project management to a manufacturer's sales rep. Besides her project management and sales & marketing background, Liana also has experience in spec writing with architects and engineers. In the past few years she has been a business development consultant for the private sector with clients in Hawaii and Guam. She is focused on being "solution based" and sees challenges as opportunities.

Unistrut Defender

- Corrosion-resistant coating
- 3X the performance of Hot-Dip Galvanized
- Avoids costly stainless-steel hardware
- Low maintenance – eliminating the need to replace parts over time
- Unique self-healing properties
- Channel fittings & pipe clamps meet the physical requirements of ASTM A1011SS GR33

Brownsville TX case study

This case study shows the effective anti-corrosion properties of Unistrut Defender. After one year the pre-galvanized (PG) strut could not hold up to the Defender series strut. You can also see below that a cut end shows very little corrosion after 1 year. At 1/3 of the price of stainless steel, the Unistrut Defender line is a great alternative to stainless steel.

Four stocking locations across Hawaii to serve your needs on general safety, Unistrut, signs and traffic control equipment sales and rentals
